

# REACH Registration as Lead Registrant (LR)

**‘The Lead Registrant acts with the agreement of other registrants for the same substance and there can be only one Lead Registrant per substance’**

If a substance is of strategic importance to your company and no other lead registrant or REACH consortium is in place, or if you hold valid data for the REACH registration of the substance, you should consider registering the substance as lead registrant.

As a lead registrant, you will be required to prepare a complete registration dossier (technical dossier + chemical safety report) in IUCLID 5 and submit it to ECHA.

## REACH Registration: What information is required?

### 1. Technical Dossier (> 1 ton per year)

- Identity of manufacturer/importer;
- Identity, volume and identified uses of substance;
- Classification and labelling ;
- Study report and robust study summaries according to Annex VII to X (physicochemical, toxicological, eco-toxicological properties, etc);
- Testing proposal;
- Statement whether tests have been carried out on vertebrate animals;

### 2. Chemical Safety Report (> 10 ton per year)

- Human hazard assessment, physicochemical properties assessment, environmental hazard assessment and PBT/vPvB assessment;
- Exposure Scenario is required if classified as dangerous or PBT/vPvB;
- operational conditions and risk management measures for each use;
- exposure estimation;

## Our REACH Registration Services

CIRS will provide end-to-end solutions to REACH registration. We provide a full range of registration services in one package to help you prepare a registration as lead registrant. These services include:

- Total cost evaluation
- SIEF/consortium management;
- Data gap analysis, literature search, GLP testing, QSAR and read-cross;
- Testing proposal;
- Full registration dossier preparation including technical dossier and chemical safety report;
- Safety data sheets;

## Reasons to choose us include

- Registered over 180 substances
- Largest OR in the World
- Developed extensive substance specific registration experience;
- Broad communications with SIEF/Consortium;
- No hourly rates or hidden charges;
- Success guaranteed;
- Free regulatory updates and free consultations;
